Career Objective

Passionate Full Stack Developer adept at crafting compelling digital solutions. Proficient in Node.js, React.js, JavaScript, and Java, with a keen eye for detail. Excels in creating intuitive user experiences and scalable applications while staying abreast of industry trends and contributing to innovative projects

Education

National Institute of Technology, Hamirpur H.P July. 2019 – July 2023
B. Tech In Electrical Engineering *Percentage: 75*

Army Public School, Dagshai, Solan H.P April. 2016 – March 2017
Higher Secondary (Class XII) *Percentage: 80*

Projects

Social Media Api | *Javascript, NodeJs, ExpressJs, Swagger, Postman and Mongoose* | **GitHub** live

- Developed a comprehensive Social Media API using Node.js, mirroring popular social media platforms, and implemented robust authorization controls to ensure users can only perform actions aligned with their assigned roles.
- User Management : Developed a user management system encompassing secure user registration, authentication, and profile management, enabling account creation, secure login, and profile updates with pertinent information.
- User Interface Api: Designed an interactive user interface allowing users to seamlessly create image posts, with features enabling liking and commenting on posts, fostering user engagement and social interaction within the platform .

Employee Review System | *Html, Css, Javascript, Bootstrap, EJS, NodeJS, ExpressJS, Mongoose* | **GitHub** live

- Developed an Employee Reviews Management System enabling employees to give peer performance feedback. The system provides administrators with comprehensive tools for managing feedback, employee assignments, and promotions.
- User Authentication: Secure login system for employees and admins.
- Employees: Submit feedback of peers assigned by admins and can view received and submitted feedbacks.
- Admin's: Have access to an admin dashboard to oversee all reviews, give, assign feedback tasks, manage employees and promotions .

BuyBusy | *Html, Css, React and Firebase* | **GitHub** live

- Developed BuyBusy, an e-commerce web application utilizing Redux Toolkit for efficient global state management, ensuring a seamless user experience.
- Integrated Redux Toolkit to create a centralized store for persistent state management, enhancing scalability and performance.
- Implemented login functionality allowing existing users to securely access the platform.
- Enhanced user experience with dynamic product filtering via a sidebar, enabling users to filter products by price.

Chatter Up | *Html, Css, Javascript, Bootstrap, ExpressJS, Mongoose, Socket.io* | **GitHub** live

- Developed a group chatting application with frontend and backend with cool ui and design using socket.io.
- User can enter their name and random pic is aasigned and then app loads and their name displayed at top can see all previous chats of users and send messages.
- Users, can see the online users on the screen and can also see who is typing currently.

Technical Skills

Programming Languages: Java, C/C++, HTML/CSS, JavaScript
Web Technologies: NodeJS, ReactJS, MySQL, MongoDB, Firebase
Frameworks/Libraries: JQuery, Django, Bootstrap, Mongoose, Express.
Other/Tools : DSA, OOP,DBMS, Postman, Git
Non Technical Skills: Logic & Reasoning, Problem Solving, Continuous Learning.

Trainings

Coding Ninjas April 2023 – Dec 2023
Full Stack Web Development

- **Backend** | **Frontend** | **Java** | **Data Structure**
